

Weed Control Mat

A cost effective and environmental friendly way of controlling weeds.

WHAT IS WEED CONTROL MAT

Ag-Tech Weed Control Mat is made of high quality Polyethylene yarn with Ultra Violet stabilised properties. It prevents any sunlight penetration. As such, it inhibits any weed growth. Being woven and hence porous, water and nutrients can pass through.

ITS ADVANTAGE AND AREAS OF APPLICATION

Ag-Tech Weed Control Mat is an ideal material for areas where weed control is absolutely necessary. It is a cost effective and environmental friendly method compare to conventional way of using herbicide sprays. This products is suitable for use in all crops (especially for the newly transplanted seedlings of plantations and orchards) as well as in plant nursery, green house flooring, house compounds etc.

METHOD OF APPLICATION

Just roll out **Ag-Tech Weed Control Mat** on the desired area and hold in place with pegs or cover the edges with soil. In areas where extremely vigorous weeds are present, it is advisable to spray a round of herbicide first.

UV PROTECTED

BREATHABLE
